

Is your company getting the most from your MANAGERS or LEADERS? or are you a leader looking to develop your skills?

Postgraduate qualifications open the door to new career opportunities, better wages and increased job or personal fulfilment.

At The Grimsby Institute we offer a variety of Foundation Degrees and Masters qualifications ranging from the Foundation Degree in Food Manufacturing Management to a Masters Qualification in Business Administration. These management development programmes are flexible, high quality and can be tailored to meet the needs of your business, all delivered in Grimsby and validated by our partner universities. Foundation Degrees are a great way to study, typically 4 hours per week they fit in flexibly with many job roles and incorporate a work-based project which often leads to significant savings or real improvements in the business.

CMI Level 5 Diploma in Management & Leadership

This course is intended for the 'hands-on' manager whose role is to manage limited resources in order to achieve specific results.

Designed to enhance your existing management skills, the focus is on the practical approach using plans or methods to achieve specific, short to medium-term aims. This stimulating and intensive course explores a number of different issues including general management, teamwork, financial management, HR management, information & communication management, marketing and planning.

MBA Business Administration

Recognised worldwide as the premier management qualification, the Masters in Business Administration (MBA) Degree is the most advanced taught management programme available in the UK. The MBA is designed to follow on from the Chartered Management Institute's level 7 Diploma in Strategic Management & Leadership or equivalent professional qualifications. The programme specifically aims to develop your strategic capability, personal, interpersonal and communication skills.

I was honoured to be nominated, let alone win the Adult Learners Yorkshire & Humber Side Award; without the support of my friends and colleagues at TSC Foods Ltd I probably would have doubted my ability to complete the course.

The commitment shown by TSC Foods Ltd to take seriously the personal development of staff members should also be commended.

I would also like to say a huge thank you to the Grimsby Institute and the course tutors I have had the privilege of learning from over the past 3 years.

Nessie Doolan, Area Manager TSC Foods Ltd

CMI Level 7 Diploma in Strategic Management & Leadership

This programme is designed for the middle to senior manager eager to translate organisational strategy into effective operational performance.

It is aimed at the manager keen to advance a knowledge of management in a way that relates directly to your own practical experience to date. It is equally valuable for the individual who aspires to such a role, by helping them to gain the fundamental knowledge and understanding of what effective management entails in today's competitive marketplace.

MSc Productivity & Innovation

This course offers you a unique and challenging opportunity to understand the concepts and practices behind the creation and ongoing development of high performing organisations - aspiring for and maintaining world-class performance.

It is designed to help you develop as a reflective, flexible, responsible, strategic thinker able to lead organisations towards a consideration of the wide set of issues that determine innovative practice as well as performance and productivity, both now and in the future.

FD Manufacturing Management

This programme provides a high quality vocational programme that enables students to achieve both career and personal development aspirations. It also provides a unique opportunity for employers to invest in their employees as a core strategy to develop their business.

The benefit is an increase in earning potential and in acquired specialist knowledge, which can be used in any environment. The benefit to an employer is the improvement in business performance and motivation at all levels within an organisation.

FD Retail Management

This programme enhances your business and management skills within a retail context as well as equipping you with essential general managerial knowledge. It is also the perfect opportunity for anyone needing to gain accreditation for relevant work experience.

Combining academic study, investigation and research in business and management practices with relevant practical application and experience, it is the perfect opportunity to put theory into successful practice within your existing environment or a relevant work placed setting.

"For me, one of the key attractions of the Foundation Degree in Retail management was that a lot of the aspects are relevant to the workplace so I have been able to apply them. The tutors have been extremely supportive throughout and I would recommend this course to anyone in a retail or management environment".

Laura Norman,
Foundation Degree in Retail Management student

"I decided to embark upon the MBA qualification to develop my strategic decision making to allow me to operate at a senior level within my organisation. The MBA has provided me with the confidence and knowledge to undertake further responsibilities and influence the direction of my organisation, by combining my own knowledge and skills with management theory to produce positive actions. The whole experience has been fantastic, helping me exceed expectations and leading to a promotion to my current role."

Dave Smith, Head of Business Development, Equity Insurance Brokers Ltd

FD Food Manufacturing Management

This programme has been specially designed to provide real, tangible benefits to both student and employer. The region has a high concentration of food manufacturers. As a result, many local production operatives and team leaders increasingly manage and undertake complex tasks.

The Foundation Degree is designed to enable you to develop your personal and professional skills, update your knowledge, and enhance your career fulfilment and prospects within this highly relevant field.

FD Logistics Management

This programme enables students to get a foot on the ladder in one of the world's biggest business growth areas: Logistics Management.

The aim of the Foundation Degree is two-fold. Firstly, it aims to provide a high quality vocational programme that enables students to achieve their career and personal development aspirations. Secondly, it enables employers to invest in their employees as a core strategy towards succession planning and developing their business into a cutting-edge, global competitor.
